

## ***Map Research Activity***

Name: \_\_\_\_\_

Choose a historical map that you find interesting and write about it. Include some key information like where it is from, who made it, how did they make it, what is it depicting?

After you've done that, look at some of the visuals of the map, the art, graphs, whatever it may be. Write about their importance to the map, how they help carry a specific message, what they are trying to show, etc.

**If done in a class setting:** Finally, look at a classmate's map research and write down some key points that you found interesting about their map. Be sure to include the name of the map or at least specific descriptors of what their map is.
