

S.S.E.  $\frac{1}{2}$  E from the same lighthouse one & a fourth miles lies the western part of Taylors reef. Here are two or three broken patches of uneven ground, extending NE & SW an eighth of a mile in length, having at low tide from  $2\frac{1}{2}$  to 5 fathoms, in rough weather it shows a heavy breaker. Between this reef and the Cape there is 8, 10, 15 and 20 fathom water.
